Sub: Requirement of ACs, Refrigerators, Invertors, Computers & Smart Phones

It has been a known fact that regular assessment of laboratories under his jurisdiction is an indispensable part in ensuring reliability in the water quality test results as well as capacity building process which determines whether the intending goals are achieved or not. The MDWS is also of the opinion that performance evaluation on time to time basis is extremely necessary in identifying the existing gaps with a scope for further improvement. In this regards, a set of questionnaire has been developed by MDWS for ranking rural water testing laboratories under different categories.

The said questionnaire consists of stipulated points for provision of such facilities in water testing laboratories i.e ACs, Refrigerators, Invertors, Computers, etc. The District Consultants have informed that some of the above mentioned appliances in different laboratories are beyond repair as those instruments are mostly very old (10 to 16 years) and have been damaged after prolonged use and natural wear and tear.

For the reasons as elucidated in para 1 of this letter, the defunct appliances and equipment need to replace with new one.

In this context, a laboratory wise tentative list of defunct ACs, Refrigerators, Invertors, Computers & Smart Phones, have been prepared through information as gathered from the District Consultants (*Annexure I*). He is requested to verify, authenticate and send the same for laboratories under his jurisdiction to this end within 7th February, 2019.

Superintending Engineer, WQ
